Stoneville 2B

■ ■ ■
AGAIN THE FAVORITE
FROM THE PRODUCER
TO THE MILLS

THE EIGHT CHARACTERISTICS OF SUPERIOR COTTON:

- HIGH YIELD
- EASE OF PICKING
- CONSISTENT FIELD PERFORMANCE
- UNIFORM STAPLE LENGTH
- GOOD LINT PERCENTAGE
- EXCELLENT MILL PERFORMANCE
- HIGH TEXTILE STRENGTH
- HIGH GRADE SEED

STONEVILLE 2B combines these eight characteristics in *perfect balance* to form a cotton that has given a performance record *unequalled* in the field and in Experiment Station Tests. STONEVILLE 2B has been accepted among farmers, ginners, merchants, and mill men as a *measuring standard* of the characteristics of TOP QUALITY Cotton. This position of "favorite" among the men who know is not a matter of chance. The superior qualities of STONEVILLE 2B are the end products of tedious, scientific selection and breeding over a period of many years. The record of STONEVILLE 2B is one of *continuous dependability* year after year. If you are planting cotton, why not plant the *best*?

Stoneville 2B

ONE OF THE WORLD'S FINER COTTONS

This Unequaled Record of Performance Shows Why *Stoneville 2B* Continues to be Favored from Producer to Mill.

The information listed below was taken from the impartial reports of the Mississippi Experiment Station. Test results from Vicksburg to Tunica prove the rating of STONEVILLE 2B as tops in Money Value per acre.

<i>Year</i>	<i>Variety</i>	<i>Rank in Test</i>	<i>No. of Tests</i>
1938	Stoneville 2B	2nd in Money Value per acre	7
1939	Stoneville 2B	1st in Money Value per acre	8
1940	Stoneville 2B	5th in Money Value per acre	4
1941	Stoneville 2B	1st in Money Value per acre	4
1942	Stoneville 2B	1st in Seed Cotton per acre*	7
1943	Stoneville 2B	1st in Money Value per acre	7
1944	Stoneville 2B	1st in Money Value per acre	7
1945	Stoneville 2B	3rd in Money Value per acre	7
1946	Stoneville 2B	1st in Money Value per acre	7
1947	Stoneville 2B	1st in Money Value per acre	7

* Money value data not available for 1942.

Stoneville 3202

A New STONEVILLE COTTON

HIGH GIN TURN-OUT

STONEVILLE 3202 has an exceptionally high gin turn-out, a feature that greatly increases its value as a specialized cotton. STONEVILLE 3202 turns out from 37 to 39 per cent lint. In recent tests at the Louisiana Experiment Station at St. Joseph, STONEVILLE 3202 produced a gin turn out of 38.5%.

LIGHT FOLIAGE

STONEVILLE 3202 is a cotton with light foliage thereby reducing the danger of extensive boll rot. This characteristic is especially important in areas of heavy rainfall which tends to produce excessive vegetative growth. Light foliage decreases the threat of boll weevil infestation.

EARLY MATURITY

STONEVILLE 3202 features the third characteristic of early maturity, thereby eliminating many of the dangers that often result in lower per acre income. A "first bale crop" of STONEVILLE 3202 beats the boll weevil and the bad fall weather.

Farmer tests on STONEVILLE 3202 have been used extensively in addition to Experimental Station tests in 1949. Tests have been made in the areas around Opelousas, Lafayette, and New Roads in Louisiana. Reports so far have been outstanding as to production, gin turnout, light foliage, and early maturity. County agents, ginner, and farmers have been generous in their praise of STONEVILLE 3202.

Developed especially for the Gulf Coast Area . . . but proving itself over the South wherever light foliage and early maturity are essential.

STONEVILLE 3202

A NEW MEMBER OF A FAMOUS FAMILY

STONEVILLE 3202

After seven tedious years of scientific breeding, testing, and developing, the first sack of STONEVILLE 3202 reaches the final stage of production in the processing plant of the STONEVILLE PEDIGREED SEED COMPANY. This new member of the famous STONEVILLE family of pedigreed seeds has been developed to meet the need for an early maturing, light foliage cotton with a high gin turn out . . . another success in STONEVILLE'S record of service to the cotton industry.

DELFOS 9169

**Earlier
Maturity**

**High Processing
Value**

**High
Production**

**Longer
Staple**

**Big Easy
Picking Boll**

Proving its **Superiority** Throughout the Cotton States as it has in the Mississippi Delta!

Characteristics

PLANT TYPE—Medium vigorous, spreading and prolific.

BOLL SIZE—65 to 75 per lb. of seed cotton.

MATURITY—Early for a big boll cotton.

PICKING QUALITIES—Good bolls, rather round, mostly five lock, and opens well.

STAPLE LENGTH—1-3/32 to 1-5/32.

LINT PERCENTAGE—35 to 38 percent.

LINT CHARACTER—Medium in fineness, strength and uniformity.

FOLIAGE—Medium.

STORMPROOFNESS—GOOD.

SEED MILLING VALUE—Extra High.

DELFOF 9169 was originally developed as the ideal Delta Cotton. Because of the splendid results it has given in field performance, this great new cotton is gaining acceptance and proving its value in every cotton producing state. Test results, shown on the back of this sheet, proved DELFOF 9169 to be the highest lint and money producing cotton tested at St. Joseph, Louisiana, and Marianna, Arkansas. In the Mississippi Delta tests DELFOF 9169 was second only to Stoneville 2B in money value per acre. Its characteristics of *earlier maturity, higher production, longer staple* and *big, easy picking bolls*, make DELFOF 9169 one of the most desirable cottons for planting in the alluvial areas. The high processing value of both its lint and its seed make for *added per acre income!*

*a New Strain of an
all-time favorite!*

8 CHARACTERISTICS OF SUPERIOR COTTON FOUND IN STONEVILLE 2B:

- GOOD LINT PERCENTAGE
- HIGH YIELD
- SATISFACTORY MILL PERFORMANCE
- EXCELLENT PICKING QUALITIES
- CONSISTENT FIELD PERFORMANCE
- HIGH TEXTILE STRENGTH
- UNIFORM STAPLE LENGTH
- HIGH GRADE SEED

• STONEVILLE 2B - 2492 is a *new strain* of the world famous STONEVILLE 2B. This fine, new cotton inherits the eight essential characteristics of top-quality cotton as found in STONEVILLE 2B, and combines them with an added vitality that gives higher production and added tolerance to certain types of wilt disease.

• In experimental tests and in farmer tests in Alabama, Georgia, South Carolina, Mississippi, Missouri, Texas, and Oklahoma it has shown great promise. If you are looking for a *new strain*, STONEVILLE 2B - 2492 is the answer . . . a *new strain* of the all-time favorite, produced by a company with 28 years experience in breeding superior cotton.

STONEVILLE 2B-2492

A NEW STRAIN OF AN ALL TIME FAVORITE

Report from Texas gives Highest praise to New Stoneville 2B-2492

MR. G. C. CLARK, *President of the EASTERN SEED COMPANY of Corpus Christi, representatives of the STONEVILLE PEDIGREED SEED COMPANY in Texas, is pictured above in a field of the new STONEVILLE 2B-2492 Foundation Cotton. MR. CLARK received the letter quoted below from Mr. R. G. SMITH, one of the Eastern Seed Company's largest customers.*

Mr. G. C. Clark
Eastern Seed Company
Corpus Christi, Texas
Dear Mr. Clark:

September 9, 1949

I am in receipt of your inquiry regarding the new improved STONEVILLE 2B-2492 planted on my farms near Harlingen, Texas, this year. As you know, for the past 25 years I have grown many thousands of acres of cotton in various sections of Texas. This year my acreage, including tenants, consisted of approximately 16,000 acres of cotton.

During my years of farming, I have planted most all the leading varieties of cotton, but the new Improved STONEVILLE 2B-2492 is the best cotton I have ever grown.

Yours very truly,
/s/ R. G. SMITH
Harlingen, Texas
